SPEECH THERAPY FOR KIDS

What is Speech Therapy (ST)?

Are you concerned
with your Child's
LANGUAGE ABILITY?

Does your child have
DYSLEXIA and/or
SPEECH DISORDERS?

Does your child have
**LEARNING
DIFFICULTIES?**

What is paediatric Speech Therapy (ST)?

Speech and language therapists assess if a child has speech and/or language difficulties, communication or eating and drinking difficulties. The therapist will determine the impact these difficulties will have on the child's life and will set goals to help the child reach their communicative potential.

Communication skills are central to intellectual, educational, social and emotional development. Therefore, speech and language therapists work with children and young people who have difficulties with understanding, expressing themselves and using communication to socialise appropriately. Any difficulties the child presents with are targeted in Speech Therapy through fun and interactive activities.

**Speech, Language and
Communication
are essential
in day-to-day life.**

Common Referrals to ST include:

- Mild, Moderate or Severe Learning Difficulties
- Physical Disabilities
- Language Delay
- Specific Language Impairment
- Specific Difficulties in Producing Sounds
- Hearing Impairment
- Cleft Palate
- Stammering
- Autism/Social Interaction Difficulties
- Dyslexia
- Voice Disorders
- Selective Mutism
- Difficulties with Eating, Drinking and/or Swallowing.

Individual Speech Therapy Sessions

Individual speech therapy sessions target the specific areas of difficulty as identified by a thorough assessment conducted by the speech and language therapist. Children will receive a one-hour session suited to their specific needs. Half an hour sessions can be offered in special cases. The speech and language therapist will recommend the number of sessions required based on the child's individual needs.

School Speech Therapy Sessions

School speech therapy sessions will integrate a range of targets into a group setting. The main areas targeted would be the following; developing and extending expressive and receptive language, social communication skills, listening and attention. Speech therapy in the school setting consists of group activities and games in which the child's IEP speech goals are targeted. Speech therapy groups are 30 minutes and take place twice a week during one morning and one afternoon.

Our centre had invested over **\$100,000** in the most updated Assessment Tools, Equipment & Materials!
