SPEECH THERAPY

Whether your child is speech delayed, has articulation problems, social pragmatic issues, or is a picky eater... our professional Speech Therapists are here to help.

SPEECH, LANGUAGE, & COMMUNICATION ARE ESSENTIAL IN DAY TO DAY LIFE.

Children need to communicate with peers and teachers in school, with family members, and with friends or other individuals in a social settings.

A Speech Therapist helps children with speech, language, or communication difficulties, as well as children with eating or swallowing difficulties.

WHO CAN BENEFIT FROM SPEECH THERAPY?

Children with speech delay, unintelligible speech, articulation and phonology disorders, Autism Spectrum Disorder (ASD) and children with difficulties with feeding or who are drooling.
